Aussie T610 SAR truck
(day cab).
Resin kit, 1/24

Warning!

For the best results we highly suggest to use our photo-etched chassis for Aussie T610 (day cab) truck. But you still can use an Italeri's generic American chassis (except Volvo VN and Peterbilts).

Read carefully this instruction and please follow it during assembling, otherwise you could face problems with assembling the model.

Photo-etched parts have sharp edges, please be careful.

This model kit contains very small parts and is **not suitable for children**.

This model kit is for advanced modellers only!

You can download this instruction as PDF-file at the our site at «Instructions» section, or use QR-code on the last page.
